Before investing, carefully consider the FlexShares investment objectives, risks, charges and expenses. This and other information is in the prospectus and a summary prospectus, copies of which may be obtained by visiting www.flexshares.com. Read the prospectus carefully before you invest.

Foreside Fund Services, LLC, distributor.

Please see back for additional important information.

**Duration is a measure of the sensitivity of the price (the value of principal) of a fixed-income investment to a change in interest rates.*

An investment in FlexShares is subject to numerous risks, including possible loss of principal. Fund returns may not match the return of the respective indexes. A full description of risks is in the prospectus.

FlexShares Ultra-Short Income Fund (RAVI) is actively managed and does not seek to replicate a specified index. Additionally, the Fund may invest without limitation in the fixed income and debt securities of foreign issuers in both developed and emerging markets. The Fund is at increased credit and default risk, where there is an inability or unwillingness by the issuer of a fixed income security to meet its financial obligations, debt extension risk, where an issuer may exercise its right to pay principal on an obligation later than expected, as well as interest rate/maturity risk, where the value of the Fund's fixed income assets will decline because of rising interest rates. The Fund may also be subject to increased concentration risk as it may invest more than 25% of its assets into the securities of a single developed market. Additionally, the Fund may invest without limitation in mortgage or asset-backed securities, which puts it at increased risk for interest rate/maturity risk, debt extension risk, and prepayment (or call) risk. Also, the Fund is "non-diversified" under the Investment Company Act of 1940, and may invest more of its assets in fewer issuers than diversified funds.
